

# ASSIGNMENT-2

**Program :**

```
import winsound

import time

from random import seed
from random import randint

seed(1)

for i in range(10):

    Temperature = randint(0, 100)

    humidity = randint(0,100)

    if Temperature>60 :

        print("temperature:", Temperature,end=" " )

        winsound.Beep(1000, 1500)

        time.sleep(1)

    if humidity>70:

        print("Humidity:", humidity)

        winsound.Beep(1000, 2000)

        time.sleep(1)
```
